

# Features to support facility safety

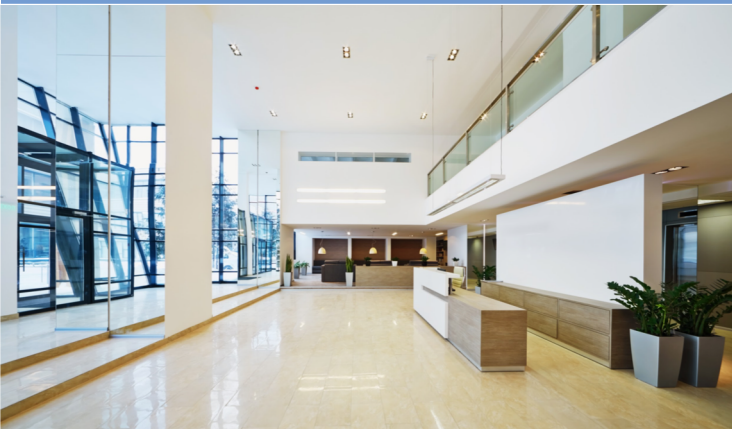

Generate targeted reports listing specific user access events and potential contacts

User Contact Reporting

Use Brivo Mobile Pass to identify users with COVID symptoms before they enter your site

Mobile Self-Screening

Suspend user access automatically until they go through a screening checkpoint

Personnel Control

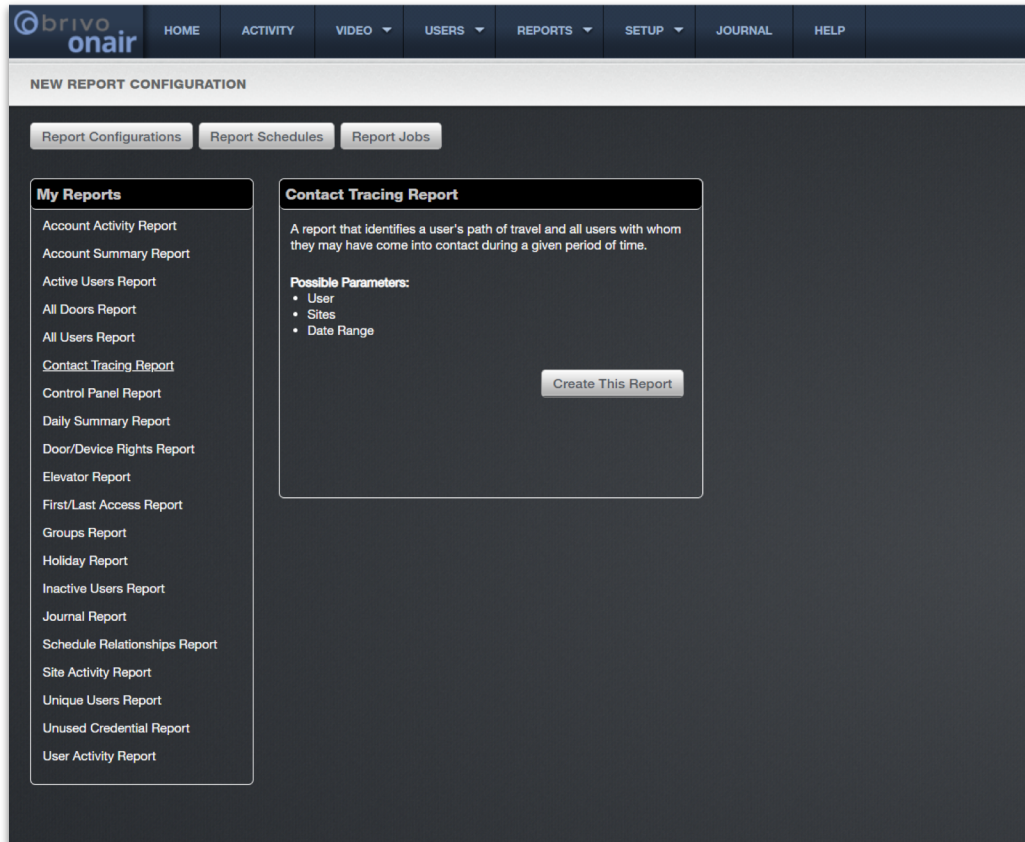

Screen all visitors for COVID symptoms

Notify hosts when their visitors may pose a risk

Brivo Visitor Enhancements

# User Contact Reporting

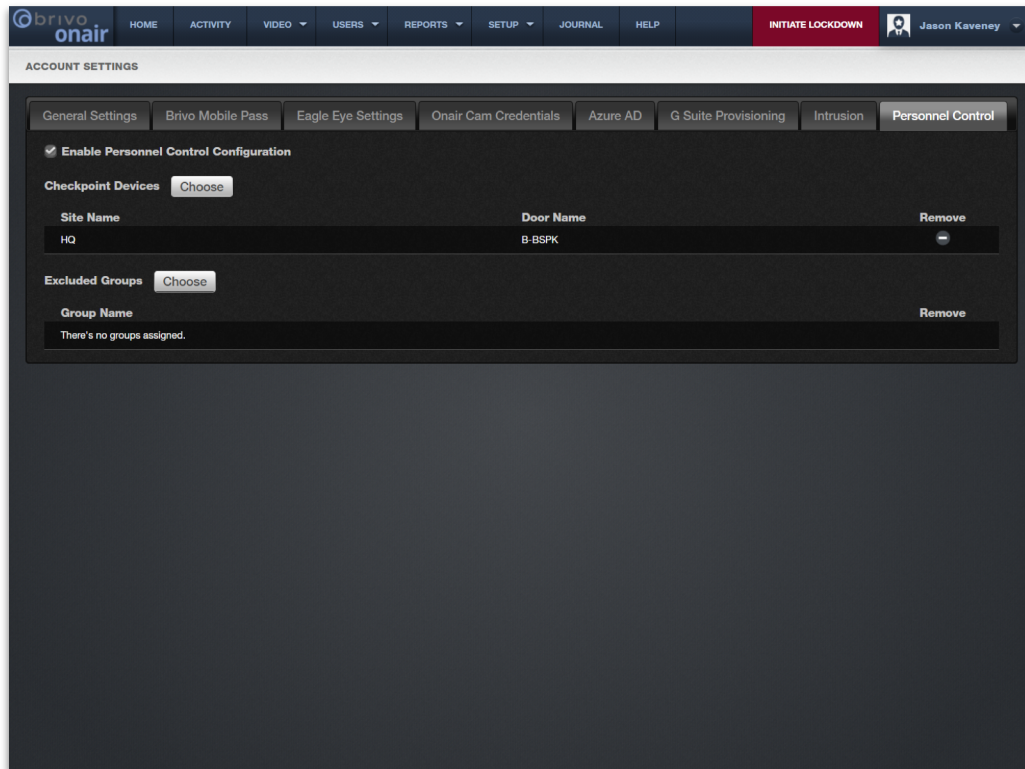

**Easily Identify Users Who May Have Been Exposed to a COVID-positive Individual**

Generate a new report showing users that occupied the same space

Filter the results based on site and date range

**Available to all Brivo Onair customers**

# Personnel Control

## Automatically Suspend All Users to Prevent Unauthorized Access

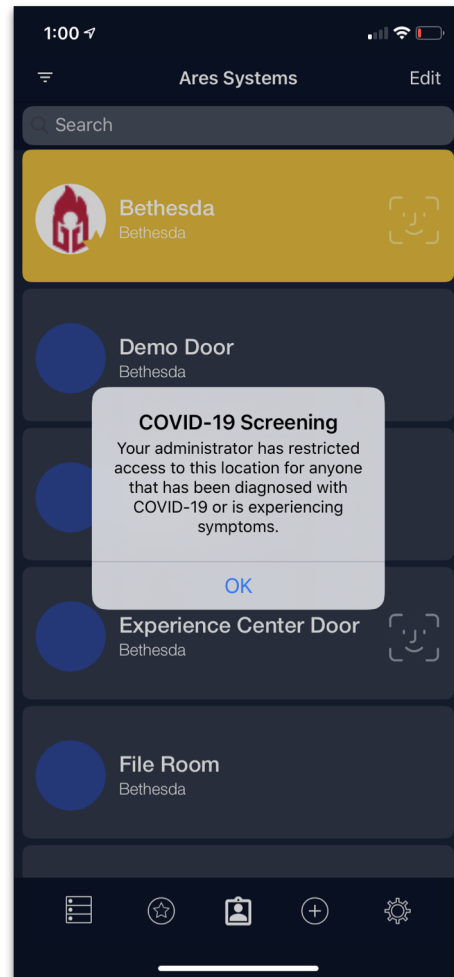

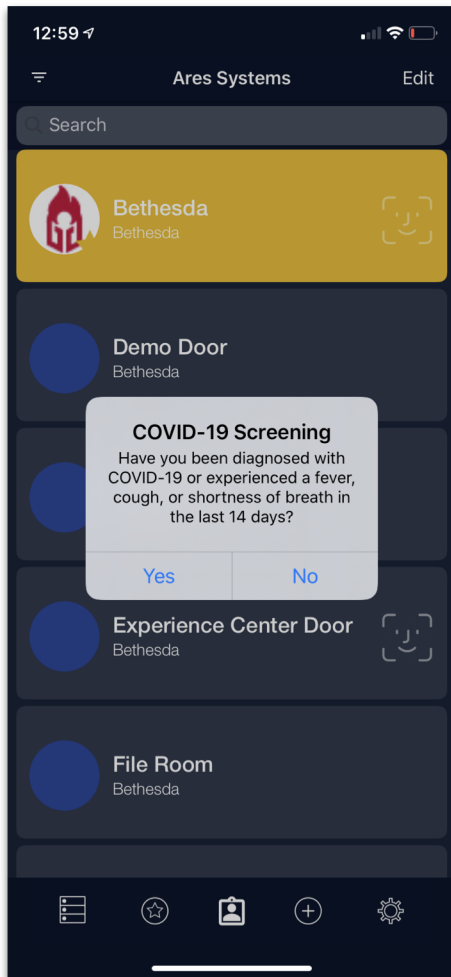

Designed for customers that are implementing screening stations

Reinstate users automatically by swiping card at enrollment reader

Offers the ability to exclude specific groups (e.g., screening team)

**Available to all Brivo Onair customers**

# COVID Self-Screening in BMP

## Confirm Users Are Not Symptomatic Before Granting Access

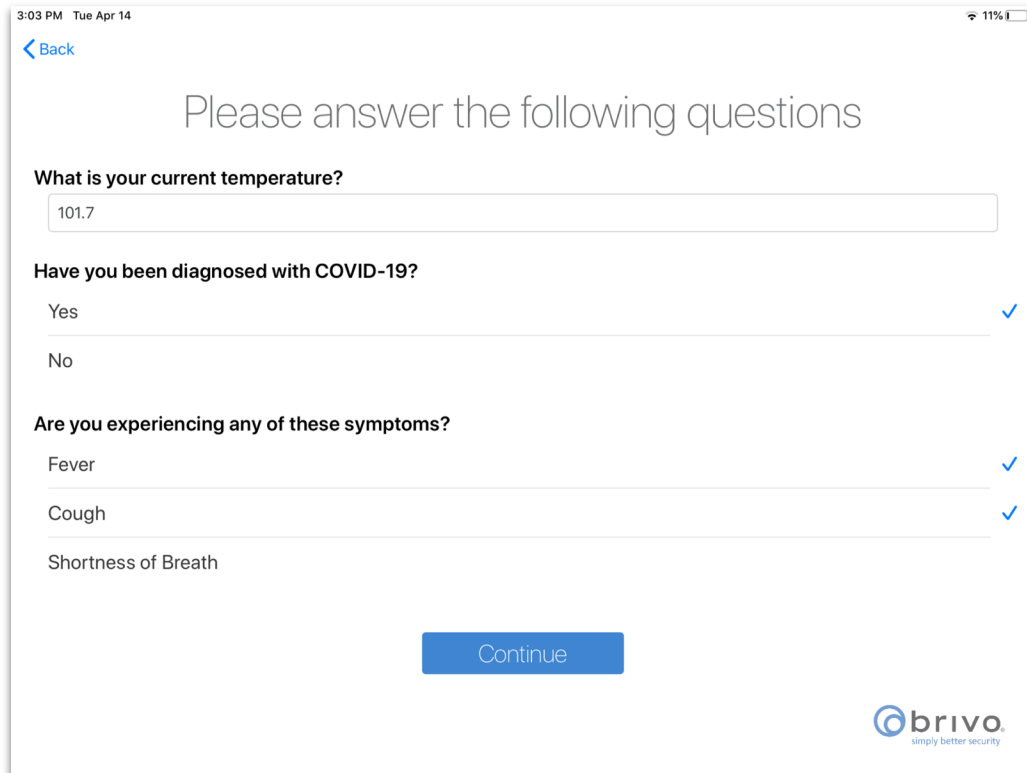

Self-screening is required each day before first unlock

Does not suspend users or deactivate credentials

Brivo does not store or transmit any user health data

Available to all Brivo Mobile Pass customers
